

## Rivet Busters

The APT model 133 Rivet Buster was originally designed to cut rivets off metal structures. Today the Rivet Buster Series is widely known for its tough, powerful tools. They have the ability to perform all types of medium to heavy demolition work. With half the weight of the 60 lb. class paving breakers, the ratio of their high impact energy versus their weight make them the most efficient tools APT makes. The model 133 meets the weight requirements for bridge deck repair work, and are also popular for cutting up underground tanks. Rivet Busters are offered in 8" and 11" stroke, and with an extended T-style handle for vertical demolition work. The Model 133 also comes in a 4-bolt style handle which incorporates a vibration dampening feature. APT also has an outside trigger model that has a safety feature to minimize the possibility of being accidentally activated.

### All Rivet Busters Feature:

- deep case-hardened alloy steel cylinder
- uses jumbo extra heavy duty tool steel
- heavy duty upper and lower sleeves
- adjustable exhaust deflector
- teflon throttle valve

### Model 133/Model 1133

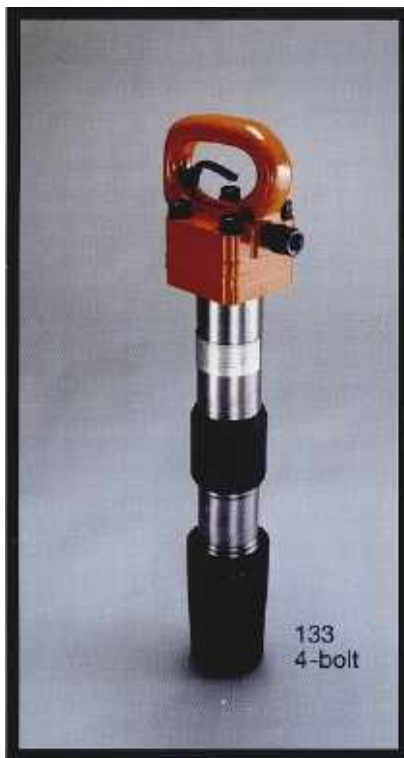

- 8" stroke / 11" stroke
- drop forged D-style handle
- inside trigger for better control and safety

### Model 133 T-Handle/Model 1133 T-Handle

- 8" stroke / 11" stroke
- drop forged T- style handle
- rubber hand grips

Model	Part Number	Bore	Stroke	B.P.M.	CFM @ 90 PSI inlet pressure	Weight lbs.	Length inches	Air Inlet NPT

1133ST Not Shown	18082	1-3/16	11	850	48-52	33	25-1/2	3/8 female
133 4-Bolt	17736	1-3/16	8	1000	36-40	28	24-1/4	1/2 female

**Model 133 4-Bolt Handle**

- 8" stroke
- inside trigger for better control and safety
- flapper valve
- handle design has a vibration dampening feature

**Model 133 ST/Model 1133ST**

- 8" stroke/11" stroke
- outside safety trigger
- drop forged pistol grip handle
